AAWC CHAIRPERSONS’ MESSAGE

Celebrating our 22nd year as an Association, we welcome you to SAWC Fall, the official meeting site of the Association for the Advancement of Wound Care (AAWC). AAWC is the largest professional, multidisciplinary, membership organization in the United States dedicated to interprofessional wound healing and tissue preservation. AAWC’s mission is to advance the care of people with and at risk for wounds. The association promotes excellence in education, clinical practice, public policy, and research.

AAWC endorses both SAWC Spring and SAWC Fall because of the exceptional educational opportunities that are provided to wound care professionals. At SAWC Fall, we are pleased to offer niche sessions, including AAWC Speaker Training, AAWC Research Poster Grand Rounds and AAWC Global Volunteers.

Members of AAWC have the added advantage of discounted registration fees to attend SAWC Spring and SAWC Fall. These discounts can more than cover annual membership dues. Other benefits of membership through the year include leadership and networking opportunities, governmental and regulatory alerts, automatic subscriptions to two premier wound care journals (OWM and WOUNDS), heavy discounts on educational materials, newsletters, a members-only section of the AAWC website, and participation in a variety of AAWC programs. These programs include: Global Volunteers, Speakers Bureau, Scholarship Program, Wounds In Need (WIN) — a Patient Advocacy group and more. Become a member today at aawconline.org to open the door to a whole year of valuable benefits!

VICKIE R. DRIVER, MS, DPM, FACFAS
AAWC Past President
Professor of Orthopedic Surgery, Brown University School of Medicine (clinical)
Director, Translational Medicine, Novartis Institute for Biomedical Research
Cambridge, Massachusetts

GREGORY BOHN, MD, FACS, ABHM/UHM, FACHM, CWSP
AAWC Current President
West Shore Medical Center for Wound Care and Hyperbaric Medicine
Harbor, Michigan

For three decades, the Symposium on Advanced Wound Care (SAWC) has provided an event at which the interdisciplinary wound care community can gather, great, learn, and play. Celebrating its 30th year in 2017, the SAWC has become the biggest and best wound care conference in the country. Our motto—One Vision, Many Faces, One Family—continues to guide us. As we embark on our 9th annual SAWC Fall, we are pleased with the continued success of this great tradition. Connected by our involvement with our patients, our healthcare settings, the government agencies that regulate our work and various overarching organizations, we work toward a common goal: decreasing the quantity and severity of chronic wounds.

Scheduled for October 20–22, 2017 at Caesars Palace in Las Vegas, SAWC Fall 2017 will offer over 40 new clinical sessions and host a major exhibition of products and services for wound care professionals. The SAWC is committed to providing the highest level of clinical education and information to physicians, podiatrists, nurses, physical therapists and allied health professionals dedicated to the advancement of wound care and healing, and we have been doing so for 30 years.

We sincerely hope you will join us in Las Vegas for what will be a rewarding experience. For more information about this meeting, please visit the SAWC Fall website at www.sawcfall.com.

ROBERT S. KIRSNER, MD, PHD
Chairman & Harvey Blank Professor
Department of Dermatology & Cutaneous Surgery
Professor of Epidemiology and Public Health,
Director, University of Miami Hospital Wound Center
University of Miami
Miami, FL

SAWC FALL offers education that is of interest to the interdisciplinary wound prevention and healing team throughout the continuum of care and across all practice settings. The meeting features several distinct tracks tailored to your educational needs and interests.

Educational Collaboration with the Society for Vascular Medicine and the Amputation Prevention Symposium

Vascular diseases account for most of the mortality and morbidity in the United States. In addition to the commonly recognized stroke, myocardial infarction and venous thromboembolism, the field of vascular medicine encompasses a broad spectrum of arterial, venous, and lymphatic diseases— all commonly identifiable risk factors of many types of wounds. In this regard, SAWC Fall has partnered with the Society for Vascular Medicine (SVM) and the Amputation Prevention Symposium (APS) to stimulate collaboration between the vascular and wound care communities to improve overall outcomes for patients with wounds resulting from vascular disease. Through the partnering, SAWC Fall, SVM and APS seek to improve the prevention, early detection, treatment and rehabilitation of people with peripheral arterial and venous disease through continued medical education at the SAWC Fall meeting.

About the Society for Vascular Medicine

The Society for Vascular Medicine is a non-profit organization that was founded in 1989 to foster a better understanding of vascular medicine and to promote the highest level of care for patients with vascular disease. The society is dedicated to improving the care of patients with vascular disease by fostering research, education, and clinical practice.

About the Amputation Prevention Symposium

Each year, critical limb ischemia (CLI) occurs approximately 65,000 to 75,000 major amputations annually and costs $2.3 billion in healthcare expenditures. CLI has a five-year mortality rate exceeding that of coronary artery disease, breast cancer and colorectal cancer. Given these alarming statistics, the Amputation Prevention Symposium (APS) fills a crucial need in the nation’s only medical conference dedicated to preventing CLI and amputations related to CLI.

SAWC Fall offers education that is of interest to the interdisciplinary wound prevention and healing team throughout the continuum of care and across all practice settings. The meeting features several distinct tracks tailored to your educational needs and interests.

TRACK 1

POST-ACUTE CARE

The Post-Acute Care track provides the audience with numerous sessions that explore a variety of practice settings that are necessary for patients who require specialized follow-up care, offering experience and advice for how to coordinate care between acute and post-acute services. These services, described collectively as post-acute care, support patients who require ongoing medical management, therapeutic, rehabilitative or skilled nursing care.

TRACK 2

ADVANCED TREATMENT OF DIFFICULT WOUNDS

The Advanced Treatment of Difficult Wounds track provides state-of-the-art information for the advanced clinician as well as other wound care clinicians who encounter complex wound situations in their daily practice.

TRACK 3

OUTPATIENT CARE OF WOUNDS

The Outpatient Care of Wounds track provides a practical overview of critical issues related to the daily management of patients with wounds.

TRACK 4

COMPREHENSIVE TREATMENT OF PERIPHERAL ARTERIAL AND VENOUS DISEASE

The Comprehensive Treatment of Peripheral Arterial and Venous Disease track provides an overview of surgical and medical treatment of vascular disease for the management of patients with arterial and venous disorders. Sessions in this track will explore vascular intervention, including new endovascular therapies for peripheral arterial disease, and treatment of venous conditions.

FOR QUESTIONS REGARDING THIS EDUCATIONAL ACTIVITY, PLEASE CALL 609.371.1137.

SAWC FALL REGISTRANTS SAVE $100

1. Covers the essentials to become certified in wound care
2. Improves your chances of passing the CWCA®, CWS®, and CWSP® board certification exams
3. Earn up to 17 CEU/CEC/CECHs
4. Taught by an interdisciplinary panel of ABWM Certified Wound Specialists
5. Only course recommended by the ABWM Foundation
6. Cost-efficient — starting at $725 if you are a SAWC Fall Registrant (separate fee for exam)

SAWC FALL has partnered with the Society for Vascular Medicine (SVM) and the Amputation Prevention Symposium (APS) to stimulate collaboration between the vascular and wound care communities to improve overall outcomes for patients with wounds resulting from vascular disease. Through the partnering, SAWC Fall, SVM and APS seek to improve the prevention, early detection, treatment and rehabilitation of people with peripheral arterial and venous disease through continued medical education at the SAWC Fall meeting.

READY TO GET CERTIFIED IN WOUND CARE?

TAKING THE EXAM: OCTOBER 20* (optional)

Caesars Palace Las Vegas, NV

GET THE DETAILS HERE woundcertificationprepcourse.com/Las-Vegas

You must submit your completed exam application, payment, reference letters and all documentation by September 29, 2017 in order to schedule your certification exam after the WPC Las Vegas course. Note there is limited availability so please submit your completed application as soon as possible.

The SAWC Fall Maximum Value Package (MVP) is the most cost-effective offer that will maximize your experience throughout the meeting. Being an MVP will let you take home educational offerings that will benefit you and your wound care practice well after the conference ends.

**MVP registration includes:**
- Unrestricted access to more than 40 educational activities over 3 days
- Access to pre- and post-conference sessions
- Opening night reception
- Lunch and continental breakfast for two days
- Three days of the premier exhibit hall in wound care
- Exhibitor guide
- SAWC Fall tote bag and t-shirt
- Chronic Wound Care: The Essentials (book)
- Access to SAWC Fall 2017 On-Demand
- Abstract book

Max out your CE potential — choose the MVP option today.

**MVP is Valuable to Your Employer Too!**
Apply to your facility to financially support your attendance at SAWC Fall. Let administration know you’ll share the clinical knowledge gained at the conference with your wound care coworkers and will pass along the educational giveaways you’ll receive as an MVP.

**Be an MVP**
REGISTER EARLY & SAVE
THURSDAY
OCTOBER 19
PRE-CONFERENCE
ADDITIONAL FEES APPLY
1:00 PM — 5:00 PM
Pre-Conference 1: Hands-on Compression Workshop: Wrapping Right, not Tight
Moderator/Spaker: Susie Ehrman, DPT, CNS, CUT-LAM, DN-Cart
Speaker: Christina Heming, PT, CDT, CNWS
In this dynamic session, attendees will learn to apply compression wrapping to manage edema across the spectrum. Attendees will explore challenging cases featuring various clinical presentations of leg ulcers (normal size leg, mild to severe edema, wound in the concavity of the malleoli, moderate swelling, moderate skin changes, highly exuding wound) and determine the best compression modality based on the ulcer type. Attendees will also participate in a hands-on lab featuring a comprehensive representation of compression modalities (2-layer cohesive, multicomponent wraps Velpeau wraps and compression stockings).

Pre-Conference 2: Offloading
Moderator/Spaker: James McGillic, DPM
Speaker: Leslie Robinson, DPM
Studies support the use of offloading in the management of diabetic foot ulcers and total contact casting is recognized as the gold standard of care for offloading diabetic foot ulcers. This interactive, hands-on workshop will provide training in the application of these casts and other offloading devices.

FRIDAY
OCTOBER 20
INDUSTRY-SUPPORTED SYMPOSIUM
7:30 AM — 9:00 AM
Opening Ceremony
9:10 AM — 9:20 AM
Keynote Address: Dream Big and Work Hard
9:20 AM — 10:20 AM
Speaker: Jean Driscoll

**4 CONCURRENT SESSIONS**
1:20 PM — 2:20 PM
**SESSION 4: COMPREHENSIVE TREATMENT OF PAD & VENOUS DISEASE**
Moderator/Spaker: Laura McManus, MD
Tackling Venous Ulcers: An Algorithmic Approach to Treatment

**SESSION 5: ADVANCED TREATMENT OF DIFFICULT WOUNDS**
Moderator/Spaker: Tanya Carman, MD
Debridement Strategies: Maximizing Success

**SESSION 6: OUTPATIENT CARE OF WOUNDS**
Moderator/Spaker: Emile R. Mohler, MD
Management of enterocutaneous fistula (ECF) is complex and often requires an interdisciplinary approach to facilitate patient care and fistula healing. Treatment strategies for ECF include soft tissue debridement, dressings, and negative pressure dressings. This session will provide a systematic approach to the management of an ECF.

**SESSION 7: POST-ACUTE CARE**
Moderator/Spaker: Steven Dean, DO, FACP, RPVI
Debridement of chronic wounds with dressing changes is a common practice for patients with various ongoing chronic wounds. Infection control and prevention of pressure ulcer formation are important aspects to consider when choosing a debridement method. This session will review the biology of wound healing, describe factors that have been implicated in the pathogenesis of chronic wounds and review modalities currently available to achieve healing.

**SESSION 8: ADVANCED TREATMENT OF DIFFICULT WOUNDS**
Moderator/Spaker: Jean Driscoll
Negative-Pressure Wound Therapy: Case-Based Approach to Tackling Challenging Wounds

**SESSION 9: COMPREHENSIVE TREATMENT OF PAD & VENOUS DISEASE**
Moderator/Spaker: Teresa Carrman, MD
Pathophysiology of Edema and Lymphedema

**SESSION 10: OUTPATIENT CARE OF WOUNDS**
Debridement Strategies: Maximizing Success

**SESSION 11: POST-ACUTE CARE**
Impaired Wound Healing: How to Overcome the Pathophysiology of the Chronic Wound

FRIDAY
OCTOBER 20
INDUSTRY-SUPPORTED SYMPOSIUM
1:10 PM — 2:10 PM
**SESSION 12: COMPREHENSIVE TREATMENT OF PAD & VENOUS DISEASE**
Moderator/Spaker: Emile R. Mohler, MD
Tackling Venous Ulcers: An Algorithmic Approach to Treatment

**SESSION 13: ADVANCED TREATMENT OF DIFFICULT WOUNDS**
Moderator/Spaker: Tanya Carman, MD
Debridement Strategies: Maximizing Success

**SESSION 14: OUTPATIENT CARE OF WOUNDS**
Moderator/Spaker: Emile R. Mohler, MD
Management of enterocutaneous fistula (ECF) is complex and often requires an interdisciplinary approach to facilitate patient care and fistula healing. Treatment strategies for ECF include soft tissue debridement, dressings, and negative pressure dressings. This session will provide a systematic approach to the management of an ECF.

**SESSION 15: POST-ACUTE CARE**
Moderator/Spaker: Steven Dean, DO, FACP, RPVI
Debridement of chronic wounds with dressing changes is a common practice for patients with various ongoing chronic wounds. Infection control and prevention of pressure ulcer formation are important aspects to consider when choosing a debridement method. This session will review the biology of wound healing, describe factors that have been implicated in the pathogenesis of chronic wounds and review modalities currently available to achieve healing.

**SESSION 18: OUTPATIENT CARE OF WOUNDS**
Debridement Strategies: Maximizing Success

**SESSION 19: POST-ACUTE CARE**
Impaired Wound Healing: How to Overcome the Pathophysiology of the Chronic Wound
Top Ten Tips for Bariatric Skin Care: Tips for Prevention and Treatment of Most Commonly

In accordance with traditional medical education, the differential diagnosis of lower extremity swelling is composed of a variety of distinct clinical entities. For example, lower leg swelling due to lymphedema is unique and can be distinguished from that of chronic venous insufficiency or lipedema. However, a recent database review of nearly 500 patients from a university hospital lymphedema center illustrated that hybrid or mixed forms of limb swelling are more likely to occur than singular causes. This session will provide a deeper knowledge of common skin conditions in the bariatric population, emphasizing psychosocial consideration and review prevention and management options to optimize skin care in this patient population.

Mastering Compression for Venous Disease

The National Pressure Ulcer Advisory Panel has held a consensus conference in April 2014 to discuss and review the current pressure ulcer staging system. This session will review the evidence-based rationale for the use of a linear staging model truly helps clinicians and patients, or does it make them vulnerable in the hands of prosecutors?

About the Association For The Advancement of Wound Care

In accordance with traditional medical education, the differential diagnosis of lower extremity swelling is composed of a variety of distinct clinical entities. For example, lower leg swelling due to lymphedema is unique and can be distinguished from that of chronic venous insufficiency or lipedema. However, a recent database review of nearly 500 patients from a university hospital lymphedema center illustrated that hybrid or mixed forms of limb swelling are more likely to occur than singular causes.

Medical Management of Vascular (Arterial and Venous) Ulcers

Moderator: Heather Hettrick, PT, PhD, CWS, CLT-LANA, CLWT

Speaker: Suzy Shemans, NP, WCOI, CWON

Speakers: Daniel Federman, MD, FACP; Albert J. Lopes, MD, FACP; RPVI, CWSP

New research has focused on nonsurgical methods to improve the management of vascular ulcers. For venous ulcers, the use of low-intensity ultrasound stimulation has shown a significant improvement in the rate of wound healing and results of a Cochrane Database of Systematic Reviews study found that intermittent pneumatic compression may increase healing compared with no compression. There is also research surrounding the possibility of using injected low molecular weight heparin to speed healing in macrothrombi ulcers in occlusive peripheral artery disease. This session will review the latest data on the medical management of arterial and venous ulcers.

Hidradenitis Suppurativa: Current Theory and Practice

Moderator: Atsushi Akai, MD, MSc, FRCP

Speaker: H. van der Meer, MD

Hidradenitis suppurativa is a chronic, recurrent, debilitating disorder, which may adversely affect a patient’s quality of life if clinicians do not adequately address the physical and emotional implications.

Medical Management of Vascular (Arterial and Venous) Ulcers

Moderator: Andrea Madera, MD

Correctional tissue disorders include a number of related inflammatory conditions such as rheumatoid arthritis, systemic lupus erythematosus, scleroderma, Sjogren’s syndrome, dermatomyositis, and mixed connective tissue disease. In addition to the systemic manifestations of these diseases, there are a number of cutaneous features such as lower extremity ulcers. The mortality associated with these ulcerations and their underlying conditions is considerable, and non-healing ulcers represent a major medical and economic problem for patients and clinicians. This session will review the multidisciplinary management of connective tissue disorders and their cutaneous manifestations.

Comprehensive Overview of Wound Care

Cell and Tissue-Based Products: Which One to Pick and Why?

Moderator: John Landon, MD, FACS

Cell- and tissue-based products (CTPs) have emerged over the past 20 years as the most carefully studied and proven of the advanced wound management technologies. CTPs have been shown to aid in the treatment of chronic venous and chronic diabetic ulcers. This session will discuss the progressions of CTPs, indications, and how to identify ulcers that do not heal well earlier to determine the best candidates for CTPs.

Comprehensive Overview of Wound Care

A Comprehensive Overview of Critical Limb Ischemia with Lower Extremity Ulcers: Diagnosis, Medical Management and Current Best Practices

Moderator: Larry Diaz-Sandovol, MD, FACS, FPIA, FAWM, FAWM, FSWM, FACP

Speaker: Arthur Lee, MD; Jeffrey Wang, MD

Although hematologic measurements continue to be a critical step in the algorithm of therapy for the CLI patient, lack of guidelines result in variation regarding the application of hemorrhagic testing and clinical values. This session will define the components of hemorrhagic testing and clinical assessment for the CLI patient, and outline the best non-invasive imaging modalities for the CLI patient.
The increased diabetic, obese and aging populations signal a future epidemic of complex wounds. This lecture will review the latest data on state-of-the-art technologies, including endovascular, indwelling pump, bone marrow and tissue-derived stem cell technologies, and evaluate the future of cell-based therapy.

Project CREW: Improving the Foundation of Care

This presentation will offer speaking basics, strategies to organize effective communication, and practical strategies for discovering the obstacles to healing, and identify potential interventions to overcome these obstacles.

Stem Cells and Gene Therapy: When Will The Promise Be Realized?

Amputation Prevention: Innovations in Endovascular Therapy for Critical Limb Ischaemia

A comprehensive discussion of the latest advancements in endovascular revascularization will be presented. The latest techniques and approaches to achieve amputation prevention will be discussed, with a focus on emerging technologies and advances in the field.

Wound Scene Investigation 1

This lecture will discuss standard care for treating pressure ulcers, provide an update on the Why Wound Care initiative and impart the importance of access to resources, creativity and the development of a well-communicated holistic therapy. The session will include new recommendations for managing complex wounds in the home setting while providing acute care and wound clinic providers recommendations for successful transition of care to the home setting.

Burn Scene Investigation 1

This lecture will discuss standard care for treating pressure ulcers, provide an update on the Why Wound Care initiative and impart the importance of access to resources, creativity and the development of a well-communicated holistic therapy. The session will include new recommendations for managing complex wounds in the home setting while providing acute care and wound clinic providers recommendations for successful transition of care to the home setting.

Burn Care 101: Updates for Non-Burn Care Specialists

This lecture will discuss standard care for treating pressure ulcers, provide an update on the Why Wound Care initiative and impart the importance of access to resources, creativity and the development of a well-communicated holistic therapy. The session will include new recommendations for managing complex wounds in the home setting while providing acute care and wound clinic providers recommendations for successful transition of care to the home setting.
**Session 45: Outpatient Care of Wounds**

**AWCC Global Volunteers**

**Moderator/Speaker:** Dr. Liza Gold, MD, PhD, CWS

**Speaker:** Maria Afshar, MD, FACP, WOCN, CWOCN

- Strengthening the Vascular territories
- Understanding the Critical Limb Ischemia and how it impacts inpatient and outpatient wound care.

**Session 46: Clinical Applications for Hyperbaric Oxygen**

**Moderator/Speaker:** Erin Brudz, RD

- Utilizing limited available resources. Attendees will learn from recent volunteers about utilizing social media data and search data to effectively and efficiently impact patient outcomes positively.

**Session 47: Palliative Care: Pearls and Pitfalls**

**Moderator/Speaker:** Oscar Alvarez, PhD, CCT, FAPWCA

- Importance when and for whom to use palliative care. This session will differentiate palliative care for chronic wounds versus palliative care for patients who have limited life expectancy.

**Session 48: Reimbursement Challenges and Hyperbaric Medicine**

**Moderator/Speaker:** Dr. Andrew Miller, MD, FACP, WOCN, CWOCN

- Understanding how to apply to volunteer and for travel scholarships.

**Session 49: Reimbursement Challenge and Hyperbaric Medicine**

**Moderator/Speaker:** Helen Gelly, MD

- Understanding how to apply to volunteer and for travel scholarships.

**Day 1: October 20, 2017**

**SESSION 44**

**Nutrition Pearls to Maximize Wound Healing**

**Moderator/Speaker:** Donna J. Carpenter, MPH, PHA, DCB, FAAPMHC

**Speaker:** Helen Daily, MD

- Hyperbaric oxygen therapy (HBO) is an effective treatment modality when utilized on the right patient at the right time. Implementation of simple protocols that support the equal report initiative have been shown to be effective to produce optimal outcomes. This session will assist wound care professionals to implement these protocols into their current practice.

**SESSION 45**

**Using Social Media and Apps to Improve Your Outcome: “There is an App for That!”**

**Moderator/Speaker:** Dr. Liza Gold, MD, PhD, CWS

- Why Wound Care
- Going Beyond Nutrition and Offloading
- Placental Membranes

**SESSION 46**

**Overcome the Pathophysiology of the Chronic Wound**

**Moderator/Speaker:** Dr. Michael M. Zreik, MD, FAAPMHC

- Best Wound Care and the Future of Hyperbaric Medicine

**SESSION 47**

**Promise Be Realized?**

**Moderator/Speaker:** Dr. Oscar Alvarez, PhD, CCT, FAPWCA

- Clinical Applications for Hyperbaric Oxygen

**SESSION 48**

**Difficult Wounds**

**Moderator/Speaker:** Dr. Andrew Miller, MD, FACP, WOCN, CWOCN

- Clinical Applications for Hyperbaric Oxygen

**SESSION 49**

**Animal Care and Wound Care For the Adult Care Provider**

**Moderator/Speaker:** Dr. Michael M. Zreik, MD, FAAPMHC

- Clinical Applications for Hyperbaric Oxygen

**Day 2: October 21, 2017**

**SESSION 44**

**Advantages of Outpatient Wound Care**

**Moderator/Speaker:** Dr. Andrew Miller, MD, FACP, WOCN, CWOCN

- Clinical Applications for Hyperbaric Oxygen

**SESSION 45**

**Oral Abstracts**

**Moderator/Speaker:** Dr. Andrew Miller, MD, FACP, WOCN, CWOCN

- Clinical Applications for Hyperbaric Oxygen

**SESSION 46**

**Outpatient Care of Wounds**

**Moderator/Speaker:** Dr. Andrew Miller, MD, FACP, WOCN, CWOCN

- Clinical Applications for Hyperbaric Oxygen

**SESSION 47**

**Reimbursement Challenges and Hyperbaric Medicine**

**Moderator/Speaker:** Dr. Andrew Miller, MD, FACP, WOCN, CWOCN

- Clinical Applications for Hyperbaric Oxygen

**SESSION 48**

**Outpatient Care of Wounds**

**Moderator/Speaker:** Dr. Andrew Miller, MD, FACP, WOCN, CWOCN

- Clinical Applications for Hyperbaric Oxygen

**SESSION 49**

**Outpatient Care of Wounds**

**Moderator/Speaker:** Dr. Andrew Miller, MD, FACP, WOCN, CWOCN

- Clinical Applications for Hyperbaric Oxygen

**Day 3: October 22, 2017**

**SESSION 44**

**Post-Conference: Additional Fees Apply**

**Reimbursement**

**Moderator/Speaker:** Dr. Andrew Miller, MD, FACP, WOCN, CWOCN

- Clinical Applications for Hyperbaric Oxygen

**SESSION 45**

**Conference Outcomes and Adjuncts**

**Moderator/Speaker:** Dr. Andrew Miller, MD, FACP, WOCN, CWOCN

- Clinical Applications for Hyperbaric Oxygen

**SESSION 46**

**Awards Ceremony**

**Moderator/Speaker:** Dr. Andrew Miller, MD, FACP, WOCN, CWOCN

- Clinical Applications for Hyperbaric Oxygen

**SESSION 47**

**Breakout Session**

**Moderator/Speaker:** Dr. Andrew Miller, MD, FACP, WOCN, CWOCN

- Clinical Applications for Hyperbaric Oxygen

**SESSION 48**

**Awards Ceremony**

**Moderator/Speaker:** Dr. Andrew Miller, MD, FACP, WOCN, CWOCN

- Clinical Applications for Hyperbaric Oxygen

**SESSION 49**

**Awards Ceremony**

**Moderator/Speaker:** Dr. Andrew Miller, MD, FACP, WOCN, CWOCN

- Clinical Applications for Hyperbaric Oxygen

**Conference Adjuncts**

**Moderator/Speaker:** Dr. Andrew Miller, MD, FACP, WOCN, CWOCN

- Clinical Applications for Hyperbaric Oxygen

**Conference Adjuncts**

**Moderator/Speaker:** Dr. Andrew Miller, MD, FACP, WOCN, CWOCN

- Clinical Applications for Hyperbaric Oxygen
Hotel Reservations
Registration for SAWC Fall must be completed before hotel reservations will be accepted. To register, please visit www.sawcfall.com. If you have completed the registration process, you will be directed to secure your hotel room. Please note that hotels will not accept reservations directly.

Hotel Reservations Deadline
Hotel reservations must be made by Friday, September 20, 2017 to ensure continuation of the special SAWC Fall rates. One night’s deposit plus tax is required to hold your reservation and is non-refundable for any cancellation. Additional guest charges will apply for more than two occupants per room.

Ground Transportation
Las Vegas Airport Transportation Service offers cost-effective transportation services between McCarran International Airport and your hotel. Non-Stop Express Service Available for $50 per person - 40% Savings vs. Taxi Fare - Immediate Boarding • On-Site Airport Staff

Executive Coach
Round-trip • $25 per person (Economy 1-Stop Service) • $22 per person

One-way • $35 per person (Express Non-Stop Service) • $30 per person (Economy 1-Stop Service) • $26 per person

Limousine Service
